

Health4Me

The new app from UnitedHealthcare

Your family's health, in your hands.

UnitedHealthcare Health4Me™ is designed to make managing your family's health a lot simpler. You can easily access the information you need, find the care you're looking for, personalize the interface with your photos and even talk to someone directly if you have questions.

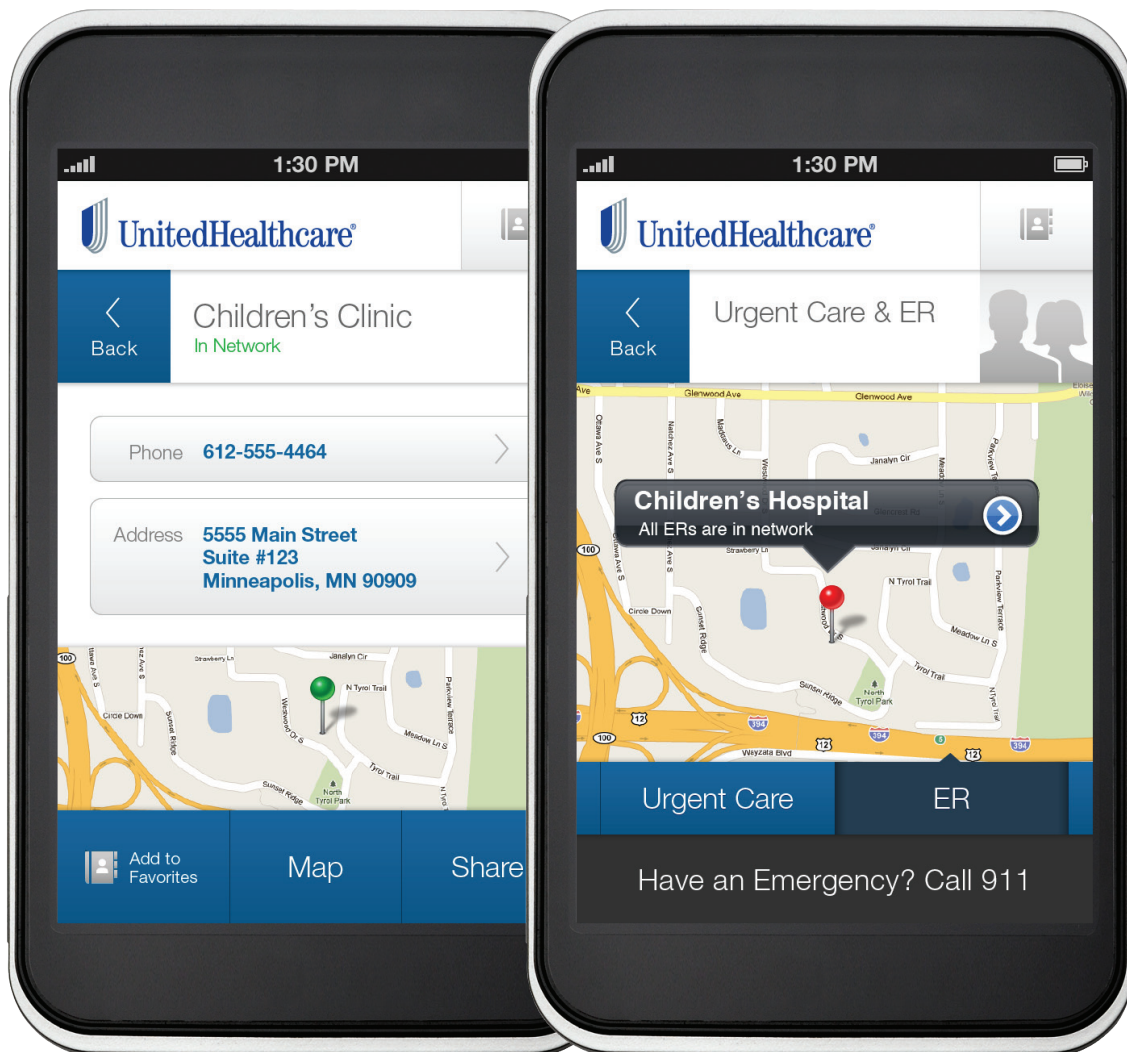

Information at your fingertips.

Having your family's health plan information on your phone means you can conveniently view and share your health plan ID card, check the balance of your HSA account or even look up the status of the claim from your son's earache.

Your roadmap to health.

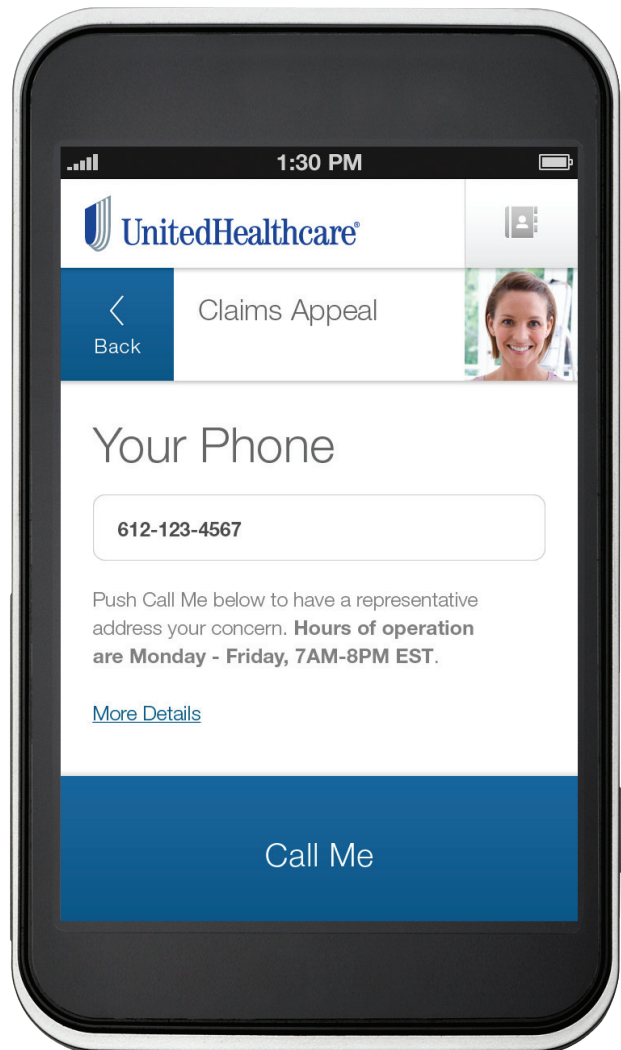

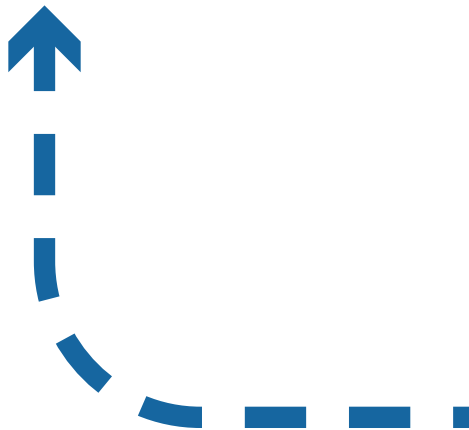

It's great to have an app that takes advantage of your smartphone's GPS to help you find the doctor or facility you need, even in an emergency. Anytime. Anywhere. Health4Me lets you search by what's closest to your current location, or by the type of care your family seeks.

A personal touch.

And while it's nice to have the control that Health4Me offers, it's comforting to know that the app can connect you with helpful, professional people when you need it. Health4Me asks what you need help with, then has a Health Advisor contact you with information.

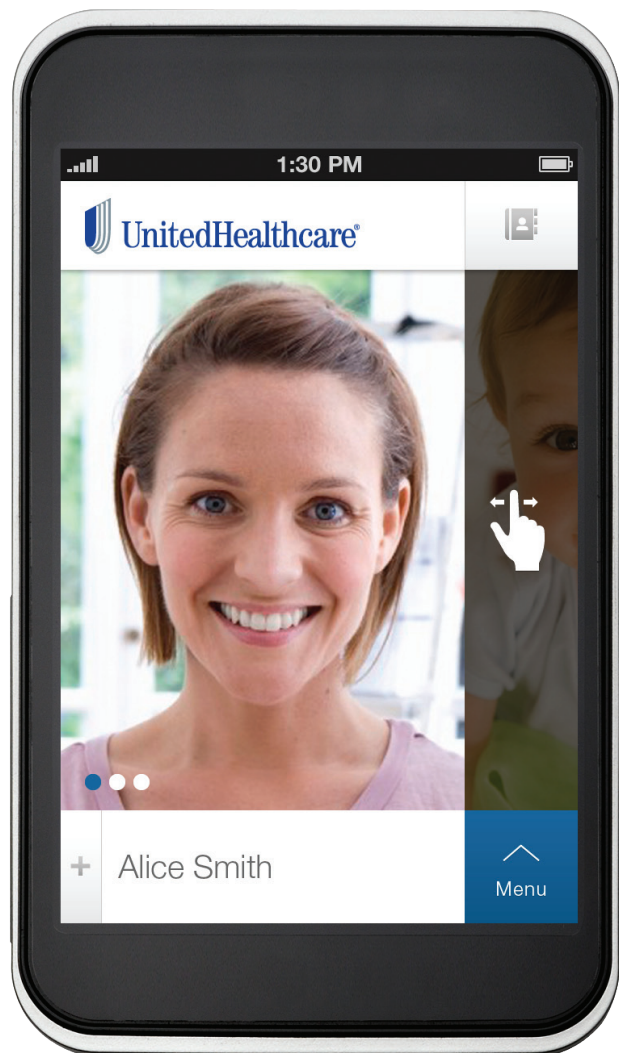

“Hello,
how may I help
with your claim?”

Built to grow.

Health4Me is designed to simplify and streamline access to your family's health care resources in a secure way that fits your life. It's a platform that is built to grow and may be an ally for helping your family lead healthier lives today, and for years to come.
